THE KEY CHALLENGE OF MANAGING BIOSAFETY AND BIOSECURITY IN DANGEROUS AND RESOURCE- CONSTRAINED ENVIRONMENTS

DATE

6 Nov 2025

TIME

11:00am – 11:45am

TOPIC:

In this online seminar, Dr Melissa Finley will share the key challenges of managing biosafety and biosecurity while working with microorganisms in resource-constrained environments. The talk will cover the activities conducted, the process of planning for the key mission, contingencies and unexpected situations. Her personal experiences, the concerns, and on the spot decisions would be relevant to those whose work may take them to similar environments. For others, it shines a light on situational awareness in planning and mental preparation.
